

NUTRIOIL

LINSEED AND RICE OIL FOR SPORT HORSES

NUTRIOIL is a brand new product in our Supplement line, it is a mix of Rice and Linseed oils that can be added to the horse ration.

The introduction of an additional quantity of oil in a ration allows to increase the total energy without having to resort to excessive amounts of concentrates which might dangerously increase the overall level of starch.

To obtain a high energy ration, any kind of oil used is useful because each oil (corn, sunflower, soy ...) has the same energy. With NUTRIOIL you can do more: in addition to energy, thanks to its composition based on Rice oil and Linseed oil, we supply the horse also nutrients that do not contain commonly used oils, while maintaining an optimum balance between fatty acids $\Omega 3$ and $\Omega 6$.

In Rice oil we can find the Gamma Oryzanol, which seems to play an important role in supporting muscle metabolism*, while Linseed oil brings $\Omega 3$ fatty acids kind, which are essential for the horse because are essential for the horse as he is unable to synthesize them himself but must introduce them into his body through food.

The presence of $\Omega 3$ in balance with the other fatty acids allows to obtain a product that becomes extremely interesting as these fatty acids play fundamental roles in many physiological cellular functions more than being the cellular membrane constituents.

Benefit of $\Omega 3$

- ➔ **Fertility and fetal development: $\Omega 3$ promote fertility the broodmare and the development of the fetus.**
- ➔ **Stallions: gli $\Omega 3$ promote the viability and motility of spermatozoa.**
- ➔ **Inflammatory reactions: $\Omega 3$ seems to have a fundamental role in the inflammatory control reactions at joint level, being the precursors of anti-inflammatory prostaglandins.**
- ➔ **Sensitivity of the skin: the intake of $\Omega 3$ seems to counteract the reactions of the skin (itchy sensation) due to bites of *Culicoides* **.**

**(CUSHING'S DISEASE AND OTHER PROBLEMS OF THE OLDER HORSE RAY GEOR R and J Veterinary Consultants, Guelph, Ontario, Canada; KER, Equine/volume 2, issue 1)*

*** (A Closer Look at Fats: $\Omega 3$ and $\Omega 6$ Fatty Acids, KER, equine review.)*

NUTRIOIL

LINSEED AND RICE OIL FOR SPORT HORSES

Composition:

Rice oil, Lin oil.

Analytical compound: Raw Oils and Fats 100% , Humidity 0%, Raw Protein 0%, Raw Cellulose 0%, Raw Ashes 0%.

ADITIVES per Lt:

Vitamin and Provitamin of chemical and analogous effects.

3a700 Vitamin E/all-rac-alfa-tocoferile acetato 100 mg

USE: NUTRIOIL, if added in the daily ration increases the fat total level providing the horse of an optimal complementary energetic source in addition to the traditional energetic sources. It brings acid fats of Omega 3 kind.

DOSIS: Administer from 50 to 100 cc of **NUTRIOIL** mixed into the horse's ration.

Store in a cool and dry place.

Complementary liquid feed
for sport horses.

5 Lt
